

Maths Homework

Maths homework will be sent home each Wednesday and should be completed and returned by Monday. We ask that children complete one task each week.

Please feel free to support your child with their homework.

Discussing questions together, encouraging them to explain their thinking and helping them to work through problems are all valuable ways to support their learning.

The homework will include a range of question types.

Occasionally, you may come across a mathematical concept that we have not yet covered in class. This is absolutely fine. Simply talk through the question with your child and encourage them to have a go. The aim is for children to develop confidence in tackling new challenges and applying what they already know.

Often, the final question on the sheet will be more challenging or may involve more than one step. Please do not worry if your child finds this difficult. These questions are designed to stretch children's thinking and provide an extra challenge.

We will also aim to share relevant online games and activities on our class page of the school website to support your child's learning. Please keep an eye out for these as they can be a fun way to practise maths skills at home.

Thank you for your continued support. Working together helps children develop confidence and enjoyment in mathematics.

Mrs. Gregory and Mrs. Taylor
